Easy To Use

Jingoo is a speaker that can be easily paired with your devices. Its high quality sound performance is created by the tweeter and woofer drivers in Jingoo's design.

Jingoo features a mono 2-way speaker, the low frequency woofer speaker is positioned in the base structure and its sound waves are reflected by the ceramic tail of the bird. A wide stereo effect is created with the sound waves from the tweeter located in the bird's body.

Advanced audio performance

To optimize the sound quality in all frequency ranges, JG01 has not only incorporated a tweeter to enhance high-pitch sound performance, but has also been designed with a crossover frequency at 1800Hz to filter all the frequencies below that to the woofer and anything above to the tweeter. In doing so, the interference between the overlap of the tweeter and woofer are avoided, and allows each to perform at its best.

Specifications

- Battery lifetime : >15hrs of music and light
- Battery capacity : Li-ion rechargeable / 4800mAh
- Amplifier power: 5W
- Drivers: One 23.5mm tweeter and one 45mm woofer
- Frequency Response: 20Hz – 20kHz
- Signal-to-noise Ratio: >75dB
- Sensitivity: 82dB/1m/1W
- Dimensions : 180x180x280 mm
- Material: Plastic/metal/ceramic/wood
- Bluetooth version: 4.0
- Bluetooth transmitter frequency range: 2.402GHz – 2.480GHz
- Wireless range: 10M
- 3-Way light level control

How Jingo is born

As a design team based in Taiwan, we want to incorporate uniquely local materials and culture into our work even when it is for the design of electronic products. The Taiwanese town of Yingge is famous for being home to ceramic crafts and holds an important place in the global ceramic industry. Furthermore, as Taiwan is an island situated in a subtropical region, it was known in the past century for its exports of wood materials.

The Bird: Porcelain Craft

The body of the bird is formed from molds for production precision and fired in traditional kilns by the masters in Yingge. The patterns for certain JG01 species are created from a technique called "ceramic decal", which requires an exhaustive experimental process to ensure that the decorations conform to the curved surface of the bird's body.

The Species

White Hwamei: Also known as the "Bird of Luck" in Chinese folk tales. The rare and precious breed sings a pleasant song, its elegant pure white color is a symbol of nobility.

Feathered China:

For those poetic minds. The blue and white china patterns transport you to an oriental land and bring literary art to your life.

The Phoenix: Favored by the sun-god Apollo, it is born from the ashes, a symbol of eternity.

L'oiseau Bleu: From the French fairy tale, the blue bird's story is one of a pursuit for bliss and happiness. It sings a joyous song for you regardless of the changing seasons.
